

14.1 G. Draft intersectoral global action plan on epilepsy and other neurological disorders in support of universal health coverage (document A75/10 Add.4).

Thank you Chair,

I am addressing the Agenda item 14.1 G. Draft intersectoral global action plan on epilepsy and other neurological disorders in support of universal health coverage.

I want to thank the Organization for the document prepared for the Assembly and those who have contributed to the action plan for their dedicated work.

In the past decades, we have seen tremendous progress in the field of medical science, but Health systems have not yet adequately responded to the burden of neurological disorders.

Supporting the appropriate health system building blocks is particularly important for improving the quality of life of people living with neurological disorders.

The Global Action Plan addresses important things for people with neurological disorders, such as human rights, care, treatment, and possible cures. With this roadmap, we may see great progress in the treatment and cure of neurological disorders within the next decade.

Madame Chair, Iceland supports the Global Action Plan.

Thank you!
